

# WEARABLES STYLE

Volume 70 . . . March 17, 2008

## Peace In

Fashion motifs come and go, but whenever America is at war one keeps on coming back: the peace sign. That universal sign for hope has started to show up more and more in recent months on fashion styles across the board. Look for a major surge in this graphic this summer and fall on everything from apparel basics to accessories such as belts, necklaces, bags and hats. No matter which side of the war debate you're on, it might be a smart idea in the coming months to give peace a chance.

From Rothco (*asi/83708*), the Olive Drab "Peace" Pullover (9237) signals a surge in popularity for the peace sign in the coming year.

**Selling Tip:** No one owns the peace sign, which mean you're free to use it on any garment you want. You can decorate items with an Andy Warhol-esque step and repeat pattern in different color washes or use a stark oversized peace sign for the greatest impact.
