

Rothco 6" V-Max Lightweight Tactical Boot - AR 670-1 Coyote Brown

Rothco's 6" V-Max Lightweight Tactical Boot is the optimal choice for an all-purpose military-style boot. The upper part of the tactical boot is made of denier nylon, and the body of the military tactical boot is made of thick nubuck leather for maximum strength and durability while having a lightweight running shoe design. Rubber outsoles provide the army tactical boots with more traction and resilience. These tactical work boots contain a removable insole and 2 screen air vents for breathability, to offer sneaker-like comfort. The lightweight duty boots feature padded collars, 7 iron eyelets, and poly/cotton boot laces as well.
